

# The Pink Pad<sup>®</sup>

The Safest, Most Clinically Proven and Preferred Trendelenburg Positioning Solution

Prevent Sliding

Reduce HAPI Risk

Avoid Nerve Injury

- **Prevent Patient Sliding**

The Pink Pad is the safest, most effective solution for reducing unwanted movement in steep Trendelenburg; even for heavy, high-BMI patients.

- **Reduce Risk of Hospital Acquired Pressure Injuries (HAPIs)**

The Pink Pad's totally unique, open-cell material is breathable, moisture wicking, insulative, soft-to-the-touch, immersive, and enveloping. **Independent studies prove that the Pink Pad reduces erythema** compared with other positioning solutions.

- **Eliminate Brachial Plexus Injury Risk**

The Pink Pad is **clinically proven to reduce post-operative pain** in surgical patients. It functions without placing pressure on the head, neck, or shoulders; thereby eliminating the risk of preventable nerve injuries.

## Pressure Relief

In a study of 15 subjects ranging from 16–54 BMI (average BMI of 35.5), the Pink Pad provided an average peak pressure reduction of 43%.

The cost of treating Hospital Acquired Pressure Injuries (HAPIs) is over \$1 billion annually, with average increased hospital stays at nine days, and non-reimbursed treatment costs potentially exceeding \$40,000 per patient.

**“Patients on the Pink Pad had significantly less displacement with Trendelenburg and faster positioning compared to the other surfaces.”<sup>2</sup>**

**Alessio Pigazzi**  
M.D., Ph.D., FACS

## Patient Safety Breakthroughs

With a mutual goal of addressing every challenge associated with Trendelenburg positioning, Xodus Medical collaborated with Dr. Alessio Pigazzi, an international leader in minimally-invasive general and colorectal surgery. The resulting Pink Pad revolutionized Trendelenburg positioning; protecting countless patients and earning more than 10 US patents.

## Material Differences

Clinical leaders in the world’s top hospitals trust the Pink Pad’s patented, HAPI-reducing material to maximize patient safety and eliminate sliding in steep Trendelenburg
